Apply What You've Learned

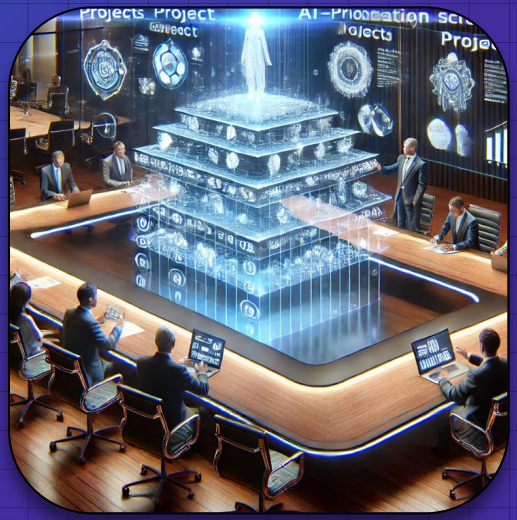
- Choose a business and identify a real challenge to solve
- Write a clear, specific prompt describing the problem
- Select the best ChatGPT tool(s) and map your workflow: research → draft → visuals

TEMPLATE #1

1. **Choosing the Right Projects**
   a. Rank projects based on impact and feasibility
   b. Align initiatives with business goals

2. **AI as a Decision-Support Tool**
   a. Provide data-driven prioritization
   b. Reduce bias in project selection

3. **What's Next**
   a. Deep dive into AI-driven prioritization frameworks



TEMPLATE #2

1. **Challenges in Timeline Management**
   a. Deadlines shift, dependencies change
   b. Manual updates take time and effort

2. **Using AI for Dynamic Scheduling**
   a. Auto-generate Gantt charts & schedules
   b. Adjust timelines as projects evolve

3. **Making AI Work for You**
   a. Save time and focus on execution
   b. Keep teams aligned with minimal effort

TEMPLATE #3

- **AI Adoption Drives Results**
  - 99% of AI-driven project managers report positive impacts
  - Early adopters see lower benefits (61%)

- **Key Areas of Improvement in PM**
  - 85% of AI project managers see better quality, scope, cost, and schedules
  - Compared to only 40% of early adopters

- **What's Next?**
  - Deeper integration of ChatGPT into workflows
  - AI for planning, prioritization, and automation
