Custom GPTs: Where to start

1. **Start with Repetitive Workflows**
   - Pick something you do often—like onboarding or responding to FAQs.

2. **Use Your Existing Knowledge Base**
   - Upload training docs, notes, or emails to power your GPT.
   - The more organized your inputs, the smarter your outputs

3. **Give Clear Instructions**
   - Tell the GPT what to do, how to format it, and what to avoid, and edge cases
